

# KENTUCKY COMMISSION ON THE DEAF AND HARD OF HEARING

## Telecommunications Access Program

The Telecommunications Access Program (TAP) provides Specialized Telecommunications Equipment (STE) to eligible applicants, which provides them with equal access to telecommunications. The STEs listed below are available through this program. Applicants are eligible or reapply after four years, or if their disability changes. **Choose carefully because equipment CANNOT be exchanged once distributed.**

### Select ONE Wireless or Telephone Equipment Only

*You should go to the AT&T store nearest you and test each phone/pager before you select the device to be sure it meets your needs and has coverage in your area. Give a store representative your address so they can check the coverage map. These devices are designed to function optimally in a 3G network.*

**Children under the age of 13 are not eligible to order the iPhone 4, iPhone 3GS, Motorola Backflip or the Blackberry Bold 9700 since these devices have direct access to the Internet.**

#### AT&T - Motorola Backflip™

Monthly service plan includes 100 minutes, 2GB of data and unlimited text messaging. Overages will shorten the length of the TAP service package.

<b>Keyboard:</b> Touchscreen/backlit keys, tactile QWERTY	<b>Messaging and Email:</b> Text and multimedia messaging (SMS/MMS), Mobile Email and IM
<b>Web Browser:</b> HTML browser for "PC-like" web browsing	<b>PC Connectivity:</b> USB 2.0 (High Speed) standard micro USB connector
<b>Touch Pad:</b> "BACKTRACK" navigation tool behind screen	<b>Bluetooth®:</b> Wireless connectivity
<b>Camera:</b> 5 MP autofocus camera with LED flash	<b>Memory:</b> MicroSD slot, 2GB pre-installed (Up to 32GB capability)
<b>Wi-Fi:</b> Capability/GPS	<b>Physical:</b> Weight 4.7oz; 133 grams
<b>Hearing Aid Compatible:</b> M3	<b>TTY/TDD Compatible</b>
<b>Using Internet services frequently on the 3G network will consume the TAP service package quickly! Connecting to a Wi-Fi network when using Internet services is strongly recommended to avoid depleting the TAP service package too quickly.</b>
